2023 President's Research Excellence Catalyst grants awarded; Accelerator proposals accepted until May 5

Five interdisciplinary Ohio State research teams have been awarded approximately \$200,000 each in Catalyst grants through the President's Research Excellence (PRE) program in the 2023 cycle. This year's grants address research in aging, cancer, energy and sustainability. Ohio State has invested nearly \$4.3 million in 48 teams of Ohio State investigators through the PRE program since its inception in 2021. The PRE program is still accepting proposals for Accelerator grants in the 2023 cycle. Accelerator proposals of up to \$50,000 are reserved for small teams formed to pursue curiosity-driven, novel, high-risk and high-reward research. These proposals are due May 5. Learn more and apply on the [Office of Knowledge Enterprise](#) website.

Briefing on NIH funding opportunities on climate change and health

Federal funding agencies are increasingly interested in both community-engaged and fundamental research pertaining to the impacts of climate change on human health, including recent funding opportunities from National Institutes of Health. Join the Office of Knowledge Enterprise research development team at noon on May 4 in the Research Commons for information and networking on NIH climate change and health research funding. A virtual option is available for the informational portion of the event. [Learn more and register](#).
